1. Introduction

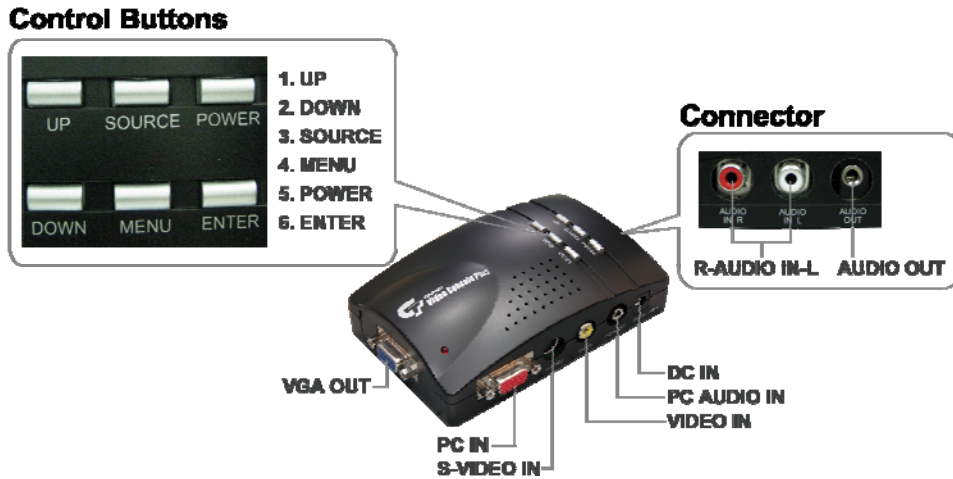

The Grand Video Console Plus is a Video to VGA converter that allows you to connect any composite or S-video source for display on any VGA monitor with outputs up to 1280 x 1024.

It is easily connected to PC, video devices, such as VCR, LD or VCD players and video game machines without any software installation, and switch the source between PC, Video and S-VIDEO instantly using a single button.

2. Product Features

- Compatible for Multi Signal inputs: Video, S-Video and PC (bypass).
- Supports one audio and VGA output.
- No software driver required. It is applicable to all the O/S.
- Supports 3:2pulldown conversion for film mode.
- Supports 2:2pulldown graphic mode.
- 3-D Motion-adaptive interfiled de-interlacing.
- Picture Mode: Sport Mode and Static Mode.
- Resolution: 640 x 480, 800 x 600, 1024 x 768 and 1280 x 1024.
- Frequency: 60 Hz and 75 Hz for each resolution.
- Support Multi-Languages: English, French, German, Spanish, Italian and Dutch.
- Includes a full-function infrared remote control.

3. Hardware Overview

4. Application

Connect any composite or S-video source for display on any VGA monitor with outputs up to 1280 x 1024.
